EXECUTIVE STATEMENT

The findings, conclusions and comments stated in this report are expressly limited to the matter specifically noted and set forth. Environmental conditions and regulations are subject to change and reinterpretation; therefore, the findings, conclusions and comments must be viewed within this context. Further, Landmark Environmental Services, Inc. (LES) has substantially relied upon the interviews, information and recitations as set forth herein and specifically the authenticity, accuracy and completeness of same is expressly conditioned upon said information so provided and the undersigned assumes no liability and specifically does not warrant any matters addressed herein beyond the interpretation and evaluation of the data received and as expressly noted herein.

This report represents the professional judgment and opinion of Landmark Environmental Services, Inc. and its associates.

I declare that, to the best of my ability, professional knowledge and belief, I meet the definition of an Environmental Professional. I have the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the subject property. I have developed and performed all the appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

David R. Lyon, E.P.
President

EXECUTIVE SUMMARY

This report presents the results of the Phase I Environmental Site Assessment (Phase I ESA) performed by Landmark Environmental Services, Inc. (LES) as “Subcontractor” for Terracon Consultants, Inc. for the City of Moline Brownfield Project (client) for a property located at 235 41st Street, Moline, Illinois (subject property). The Phase I ESA was conducted in general conformance with the “Master Agreement for Subcontractor Services” dated November 30, 2006, the “Master Agreement for Subcontractor Services Task Order” signed June 21, 2007, and is consistent with the American Society for Testing and Materials (ASTM) “Standard Practice for Environmental Site Assessments: Phase I Assessment Process” (Standard Designation E-1527-05) guidelines.

The subject property contains approximately 7,947 Sq. Ft. (MOL) with a one (1) story pre-engineered commercial building. The subject property is utilized by the property owner for the storage of equipment and supplies for their concrete construction business. A rock and gravel covered parking area is located between the building and the eastern property boundary. The subject property is located in an area developed primarily for commercial, industrial and residential use. The subject property is currently bounded by the following properties:

North: Single-family home & Road House Car Wash

East: 41st Street & Moline Forge Inc.

South: Single-family homes

West: Access Alley & Single-family homes

Based on observations made during the Phase I ESA and review of available information, the following Recognized Environmental Condition (RECs) were identified at nearby properties that could have an environmental impact on the subject property:

- A. A review of the Sanborn Maps for the year of 1950 depicted that a filling station with Underground Storage Tanks (USTs) was located at 402 41st Street, Moline, Illinois. The site of the filling station would have been approximately 250 feet north and slightly east of the subject property.
- B. A review of the EDR Radius Map report revealed that a 20,000 gallon diesel fuel UST was located at 4101 4th Avenue, Moline, Illinois. The site of the UST is approximately 275 feet east of the subject property.

- C. In addition, the Sanborn Maps for the years of 1950, 1957 and 1963 identified several car and trailer sales businesses along the corridor of 4th Avenue.

Products of concern associated with these types of RECs include the following:

Cleaners	Paint Removers
Petroleum Products	Paint Thinners
Paint	Solvents

1.0 INTRODUCTION

This report presents the results of the Phase I Environmental Site Assessment (Phase I ESA) performed by Landmark Environmental Services, Inc. (LES) at the subject property located at 235 41st Street, Moline, Illinois (subject property). It was reported that the subject property is being utilized by the property owner for the storage of equipment and supplies for their concrete construction business. Presented below is a summary of the current site development features:

- One (1) pre-engineered, single-story, commercial building
- A parking area that has a rock and gravel cover

The subject property is rectangular shaped and contains approximately 7,947 Sq. Ft. (MOL) with an existing commercial building that contains approximately 2,112 Sq. Ft. The Moline Township property record cards show that the original structure was constructed in 1994.

1.1 Purpose

The objective of the Phase I ESA is to review past and present land use practices, site operations, and conditions for the subject and nearby properties to evaluate if there are Recognized Environmental Conditions (RECs) on the subject property or whether potential RECs may occur due to documented impacts or activities at adjacent or surrounding properties. In accordance with ASTM E 1527-05, a REC is defined as:

The presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a threat to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions.

1.2 Scope of Services

The services were conducted in general conformance with the “Master Agreement for Subcontractor Services” dated November 30, 2006, the “Master Agreement for Subcontractor Services Task Order” signed June 21, 2007, and is consistent with the American Society for Testing and Materials (ASTM) “Standard Practice for Environmental Site Assessments: Phase I Assessment Process” (Standard Designation E-1527-05) guidelines. The purpose of this Phase I ESA is to assist the client in developing information to identify RECs in connection with subject property as reflected by the scope of this report.

1.3 Significant Assumptions

LES’s Scope of Services included user-provided information, a regulatory database review, historical and physical records review, a visual non-invasive site reconnaissance of the subject property and adjoining properties and reasonably ascertainable public information obtained from a variety of sources. It was not possible for LES to verify the accuracy or completeness of this information. However, the use of and reliance on this information is a generally accepted practice in the performance of environmental due diligence. During the site reconnaissance, LES visually and physically observed representative areas of the interior and exterior of the subject property.

1.4 Limitations and Exceptions

No site-specific limitations, such as inclement weather (e.g. snow covering), physical obstructions, or inability to access areas of the subject property, which limited the ability of LES to complete the Scope of Services, were encountered during the performance of the Phase I ESA.

LES’s interpretations of the reasonably ascertainable historical information; conversations with personnel knowledgeable about the site, and other reasonably ascertainable information, as referenced, is included in the report. Findings in this report are based upon the site’s current utilization; information derived from the most recent site reconnaissance and other activities described herein and, such information is subject to change. Certain indicators of the presence of hazardous substances or petroleum products may have been latent, inaccessible and unobservable. These services are not intended for legal advice or interpretation. These conclusions are intended exclusively for the purpose stated herein, at the site indicated, and for the project indicated.

This ESA was not intended to be a definitive investigation of possible contamination at the subject property. The purpose and scope of this ESA was to assist the client in developing information to identify RECs in connection with the site as reflected by the scope of this report.

This report is intended to be used in its entirety. No excerpts may be taken to be representative of the findings of this assessment.

Opinions and recommendations presented in this report apply to the site conditions and features, as they existed at the time of LES's site reconnaissance; such information is subject to change. They cannot necessarily apply to conditions and features of which LES is unaware and has not had the opportunity to evaluate.

1.5 Additional Scope of Limitations, ASTM Deviations and Significant Data Gaps

Based on the agreed-on scope of services, this ESA did not include subsurface or other invasive assessments, business environmental risk evaluations, or other services not particularly identified and discussed herein. Reasonable attempts were made to obtain information within the scope and time constraints set forth by the client, however, in some instances, information requested is not, or was not, received by the issuance date of the report. Information obtained for this ESA was received from several sources that we believe to be reliable; nonetheless, the authenticity or reliability of these sources cannot and is not warranted hereunder. This ESA was further limited by the following:

- Specific property boundaries for the site were not provided. Reference to the site property boundaries are based on observations during the site reconnaissance and the actual site property boundaries may differ.
- Some pertinent documents are referred in the text of this report, and a separate reference section has not been included.
- Land use was not determined prior to 1924.

An evaluation of the significance of these limitations and missing information with the respect to our findings has been conducted, and where appropriate, significant data gaps are identified and discussed in the text of the report. However, it should be recognized that an evaluation of the significance of these data gaps is based on the information available at the time of the report issuance, and an evaluation of the information received after the report issuance date may result in an alteration of our report. We have no obligation to provide information obtained or discovered by us after the date of this report, or to perform any additional services, regardless of whether the information would affect any conclusions, recommendations, or opinions in the report. This disclaimer specifically applies to any information that has not been provided by the client.

1.6 User Reliance

This report is intended for the use of the City of Moline, Illinois as the principal end user of this information. Although the report is available for review by the public, further reliance by others is beyond the scope of the grant and USEPA funding.

The information contained in this report is for the sole benefit of the City of Moline in determining feasibility for redevelopment and restoration of the property. The information and funding expended to produce it does not provide windfall or extraneous benefits to property owners.

The Scope of Services performed during this investigation may not be appropriate for other users, and any use or re-use of this document, or the findings, conclusions, or recommendations presented herein are at the sole risk of said user. Pursuant to ASTM 1527-05, reliance on this report is limited to 180 days from the issuance date of this report.

1.7 Client Provided Information

Pursuant to Section 6 of ASTM 1527.05, LES requested that the client provide the information to satisfy the User's Responsibility to help identify the possibility of RECs in connection with the subject property. Mr. Patrick Burke of the City of Moline (user) completed a form on June 20, 2007 that responded to the following questions.

1.7.1 Specialized Knowledge or Experience

Specialized knowledge or experience significant to the identification of potential RECs in connection with the site was requested from the client.

Mr. Patrick Burke did not have any specialized knowledge or experience that would be significant to potential RECs associated with the subject property.

1.7.2 Actual Knowledge of Environmental Liens or AULs

Actual knowledge of any environmental liens or AULs encumbering the site was requested from the client.

Mr. Patrick Burke was not aware of any environmental liens or AULs associated with the subject property. In addition, the client authorized Terracon to have a title search performed, which included a search for environmental liens for the subject property.

1.7.3 Reason for Significantly Lower Purchase Price

Actual knowledge of a significantly lower purchase price due to the presence of hazardous substances or petroleum products in connection with the site was requested from the client.

The client is not a party associated with the any purchase or sales transaction pending for the subject property. The ESA was conducted for a Community Development Project.

1.7.4 Commonly Known or Reasonably Ascertainable Information

Commonly known or reasonably ascertainable information within the local community about the site that is significant to potential RECs in connection with the site was requested from the client. Mr. Patrick Burke did not have any commonly known or reasonably ascertainable information that would be significant to potential RECs in connection with the subject property.

1.7.5 Indicators of Contamination at the Site

Information about obvious indicators that point to the presence or likely presence of contamination at the site was requested from the client.

Mr. Patrick Burke responded that since 1998 the subject property has been utilized by Lamar Cement Company as a storage facility.

The site reconnaissance and interviews with the owner revealed the subject property was being utilized by the property owner for the storage of equipment and supplies for their concrete construction business.

2.0 SITE DESCRIPTION

Information concerning the subject property was obtained from a site reconnaissance conducted by Mr. David Lyon of LES, interviews with the site owner, and review of available documents.

2.1 Location and Description of the Property

The subject property is located along the west side of 41st Street and east of an access alley in the City of Moline, Rock Island County, Illinois. The location of the subject property is presented on the Site & Vicinity Sketch located in Appendix C.

2.2 Site and Vicinity General Characteristics

The subject property is located in an area developed primarily for commercial, industrial and residential use. The Mississippi River is located approximately .25 miles north of the subject property. Commercial, industrial and residential properties are located in the immediate vicinity of the subject property.

2.3 Current Use of the Property

The subject property is being utilized by the property owner for the storage of equipment and supplies for their concrete construction business.

The following utilities are provided to the subject property:

Electricity:	MidAmerican Energy Company
Natural Gas:	MidAmerican Energy Company
Water:	City of Moline
Sanitary Sewer:	City of Moline

2.4 Description of On-Site Structures, Roads and Improvements

Presented below is a summary of the current site development features:

One (1) pre-engineered, single-story, commercial building with steel siding and roof constructed on a reinforced concrete foundation.

A parking area that has a rock and gravel cover.

2.5 Current Uses of Adjoining Properties

The current occupants of other properties in the vicinity of the subject property are shown on the Site & Vicinity Sketch. The subject property is currently bounded by the following properties:

North: Single-family home

East: 41st Street & Moline Forge Inc.

South: Single-family homes

West: Access alley and Single-family homes

3.0 HISTORICAL USE INFORMATION OF THE SUBJECT AND ADJOINING PROPERTIES

3.1 Previous Environmental Reports

LES was not provided any records or reports of previous environmental assessments.

3.2 Title Records

At the direction of the client, a title search was ordered by Terracon from Midwest Community Title for the subject property. The first recorded deed transaction was May 29, 1924 showing that the Grantee was Walter Schallow and Ralph W. & Wanda Durfee were the Grantor.

The results of the Title Search can be reviewed in Appendix E.

3.3 Environmental Liens or Activity and Use Limitations

An environmental lien search was conducted with the above mentioned title record search and no environmental liens were recorded for the subject property.

3.4 Historical Owner and/or Occupant Information Interviews

LES interviewed Mr. Dale E. Lamar (current property owner) on July 18, 2007 regarding general information on the historical use of the subject property and nearby properties.

According to Mr. Lamar, the subject property contained the existing commercial building when they purchased the property in 1999. In addition, Mr. Lamar stated at the time of their purchase of the subject property it was being utilized for the storage of drywall equipment and supplies.

In summary, Mr. Dale Lamar stated that he had no knowledge of any past or present practices that may cause a potential concern of an environmental risk or liability to the target property. Information obtained during performance of the interviews has been incorporated into text presented within this report.

3.5 Sanborn Fire Insurance Maps

LES reviewed Sanborn Fire Insurance Maps for the area of the subject property as provided by EDR. Sanborn Maps are detailed drawings that show the location and use of structures on a given property during specific years. These maps were originally utilized by insurance companies to assess fire risk, but are now utilized as a valuable source of historical and environmental risk information. Sanborn Maps are provided and can be reviewed in Appendix B. Coverage for the subject property area was available for the following years:

- 1912 The Sanborn Map did not depict the subject property or the adjoining properties.
- 1950 The subject property appears to be vacant. A filling station with Underground Storage Tanks (USTs) was depicted at 402 41st Street and the other surrounding properties appear in the general configuration as observed during the site reconnaissance.
- 1957 The subject property appears to be vacant. The Sanborn Map did not show the filling station at 402 41st Street but the surrounding properties appear in the general configuration as observed during the site reconnaissance.
- 1963 The subject property appears to be vacant. The surrounding properties appear in the general configuration as observed during the site reconnaissance.

3.6 Historical Aerial Photograph Review

Historical aerial photographs of the subject property for the years of 1959, 1985, 1994 and 2004 were reviewed by LES and an interpretation of each photograph is presented below.

1959 Aerial Photograph (City of Moline Zoning and Planning Department)

The subject property appears to be vacant. Other surrounding properties appear in the same general configuration as observed during the site reconnaissance.

1985 Aerial Photograph (City of Moline Zoning and Planning Department)

The subject property appears to be vacant. Other surrounding properties appear in the same general configuration as in the 1959 aerial photograph.

1994 Aerial Photograph (City of Moline Zoning and Planning Department)

The subject property appears in a similar configuration as observed during the site reconnaissance. Other surrounding properties appear in the same general configuration as in the 1985 aerial photograph.

2000 Aerial Photograph U.S. Geological Survey (USGS) Terra Server Web Site

The subject property appears in a similar configuration as observed during the site reconnaissance. Other surrounding properties appear in the same general configuration as observed during the site reconnaissance.

3.7 Historical Topographic Map Review

Historical topographic maps of the subject property vicinity for the years 1949, 1953, 1970, 1975, and 1991 were obtained from EDR for the Phase I ESA and an interpretation of each map is presented below. Historical topographic maps are provided in the Appendix D.

1949 Topographic Map

Portions of the topographic map are shaded which is consistent with urban development and only landmark structures are shown. No landmark structures are depicted on the subject property.

1953 Topographic Map

The subject property and surrounding area appeared to be similar to 1949.

1970 Topographic Map

The subject property and surrounding area appeared to be similar to 1953.

1975 Topographic Map

The subject property and surrounding area appeared to be similar to 1970.

1991 Topographic Map

The subject property and surrounding area appeared to be similar to 1975.

3.8 Summary of Historical Review

Based on a review of historical documents and aerial photographs, it is unlikely that the historic development and use of the subject property would result in a REC.

4.0 PHYSICAL, GEOLOGICAL AND HYDROGEOLOGICAL SETTING

Environmental characteristics including topography, geology, and hydrogeology were evaluated based on site observations, published literature, and maps.

4.1 Physical Setting

According to the Silvis topographic map (USGS, 1991) the elevation of the subject property is approximately 575 feet above mean sea level. The topography of subject property is nearly level and at or slightly above 41st Street.

4.2 Site Geology

Based on a review of the USDA Soil Survey of Rock Island County, Illinois, the subject property is underlain by soils classified as drummer silty clay loam that is nearly level, moderately well drained and moderately permeable.

4.3 Site Hydrogeology

Based on a review of area topography maps, groundwater flow direction is generally a subdued reflection of site topography, but is also generally influenced by nearby major water bodies. The most likely direction of regional groundwater flow would be north towards the Mississippi river.

However, it is possible that the nearby river and the changing levels of the river could cause localized shallow groundwater flow gradients to exist in the immediate vicinity of the subject property.

4.4 Radon

LES reviewed the U.S. EPA's Map of Radon Zones for Illinois regarding radon concentrations in the State of Illinois. The map was produced in conjunction with the USGS and is based on a statewide study of uranium geologic features with high potential for radon. All counties within the state have been assigned to one of three zones as determined by their predicted average screening level for radon. Geologic provinces in Zone 1 have a predicted average screening level greater than 4 Pico Curies per liter (pCi/l). Zone 2 corresponds to a predicted average screening level between 2 and 4 pCi/l, and Zone 3 corresponds to a predicted average screening level of less than 2 pCi/l. The map indicates that Rock Island County was assigned to Zone 1, the category having the highest potential for radon hazard.

The subject property does not have a basement. Therefore, it is LES's opinion that the potential for human exposure to significant amounts of radon gas at the subject property is low at this time. However, radon gas testing would be recommended in the future if the subject property buildings were ever remodeled to include an occupied basement area.

4.5 Wetlands

During performance of the site reconnaissance, indications of wetlands were not observed on the subject or adjacent properties.

5.0 RECORDS REVIEW

LES reviewed reasonably ascertainable information regarding historic and current site operations and conditions, as well as regulatory information regarding nearby properties. The sources reviewed included physical setting and geologic reference documents, regulatory databases, reports, interviews with site personnel, historical aerial photographs, and historical topographic maps.

5.1 Environmental Record Sources

Terracon retained Environmental Data Resources, Inc. (EDR) to evaluate whether activities on or near the subject property have the potential to create a REC on the subject property. EDR reviews databases compiled by federal, state, and local governmental agencies. The complete list of databases reviewed by EDR is included in Appendix A. It should be noted that this information is reported to LES as a forwarded electronic copy from Terracon that they received from EDR, which in turn reports information as it is provided in various government databases. It is not possible for LES, Terracon or EDR to verify the accuracy or completeness of information contained in these databases. However, the use of and reliance on this information is a generally accepted practice in the performance of an environmental due diligence. The databases included the standard ASTM databases searched to at least their respective ASTM standard search radii, as well as additional federal and state databases searched to appropriate search radius. A description of information obtained from the EDR report follows.

The location of the target property for which the search was intended is:

235 41st Street, Moline, IL

TP = Target Property
NR = Not Requested at this Search Distance
Sites may be listed in more than one database

Unmapped (orphan) sites are not considered in the foregoing analysis.

5.2 Target Property:

The target property was **not** listed in the databases searched by EDR.

5.3 Surrounding Properties:

A review of the RCRIS-SQG list, as provided by EDR, and dated 06/13/06 has revealed there are three (3) RCRIS-SQG sites within approximately 0.25 miles of the target property at the following Moline, Illinois locations:

4101 4th AVE 205 41st ST 3900 River DR

Based on the lack of violations reported for the RCRIS-SQG sites and their location relative to the subject property, it is unlikely that they are RECs for the subject property.

A review of the CAT list, as provided by EDR, and dated 06/01/97 has revealed there is one (1) CAT site within approximately 1 mile of the target property at the following Moline, Illinois location:

5447 3rd AVE

Based on the location of the CAT site and its distance from the subject property, it is unlikely that it is a REC for the subject property.

A review of the LUST list, as provided by EDR, and dated 05/11/07 has revealed there is one (1) LUST site within approximately 0.5 miles of the target property at the following Moline, Illinois location:

4201 4th AVE

Based on the location of the LUST site and its distance from the subject property, it is unlikely that it is a REC for the subject property.

A review of the UST list, as provided by EDR, and dated 03/07/07 has revealed there are four (4) UST sites within approximately 0.25 miles of the target property at the following Moline, Illinois locations:

4101 4th AVE 4201 4th AVE 204 38th ST 3900 River DR

The UST located at 4101 4th Avenue is approximately 275 feet east of the subject property. Due to its proximity, this UST site is a REC for the subject property

Based on the location of the other UST sites and their distance from the subject property, it is unlikely that they are RECs for the subject property.

A review of the IL ENG Controls list, as provided by EDR, and dated 05/11/07 has revealed there are two (2) IL ENG Controls site within approximately 0.5 miles of the target property at the following Moline, Illinois locations:

3420 2nd AVE 3900 River DR

Based on the location of the IL ENG Controls sites and their distance from the subject property, it is unlikely that they are RECs for the subject property.

A review of the IL Inst Control list, as provided by EDR, and dated 05/11/07 has revealed there is one (1) IL Inst Control site within approximately 0.5 miles of the target property at the following Moline, Illinois location:

3420 2nd AVE

Based on the location of the IL Inst Control site and its distance from the subject property, it is unlikely that this site has created a REC on the subject property.

A review of the SRP list, as provided by EDR, and dated 05/11/07 has revealed there are two (2) SRP sites within approximately 0.5 miles of the target property at the following Moline, Illinois locations:

3420 2nd AVE 3900 River DR

Based on the location of the SRP sites and their distance from the subject property, it is unlikely that they are RECs for the subject property.

5.4 Unmappable Sites

A review of the Unmappable Sites List, which includes sites that have not been geocoded based on lack of sufficient data regarding their exact location within the general area, identified eleven (11) sites.

Based on the provided Unmappable site addresses and observations made during the area reconnaissance, the identified sites are not likely RECs for the subject property.

6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

Mr. David Lyon of LES conducted a reconnaissance of the subject property on July 11, 2007, to observe present site and surrounding area conditions and operations, and to assess the potential for RECs at the subject property. Weather conditions at the time of the site reconnaissance consisted of partly cloudy skies with temperatures in the mid 80's and light southwesterly winds. During the site reconnaissance, LES visually and physically observed representative areas of the interior and exterior of the subject property.

LES also conducted a drive-by survey to observe the type of land use and nature of businesses in the vicinity of the subject property. Photographs taken during LES's site reconnaissance are provided in Appendix F.

6.2 General Site Setting

The subject property is rectangular shaped and contains approximately 7,947 Sq. Ft. (MOL) with a one (1) pre-engineered, single-story, commercial building with steel siding and roof constructed on a reinforced concrete foundation. The office area and restrooms are heated by gas-fired, forced-air furnace and cooled by a pad-mounted, central air-conditioning unit. The garage/storage area is heated by ceiling-suspended, gas-fired heaters.

The subject property is utilized by the property owner for the storage of equipment and supplies for their concrete construction business. A rock and gravel covered parking area is located between the building and the eastern property boundary.

The subject property is currently bound by the following properties:

North: Single-family home & Road House Car Wash

East: 41st Street & Moline Forge Inc.

South: Single-family homes

West: Access Alley & Single-family homes

6.3 EXTERIOR AND INTERIOR OBSERVATIONS

6.3.1 Aboveground Storage Tanks (ASTs)

During performance of the site reconnaissance, no ASTs were observed.

6.3.2 Current Tenants

The subject property is utilized by the property owner for the storage of equipment and supplies for their concrete construction business.

6.3.3 Discolored Soils

During performance of the site reconnaissance no discolored soils were observed on the subject property.

6.3.4 Drums and Other Containers

During performance of the site reconnaissance, some small containers (quart to 5 gallon) of paint, lubricants, cleaning supplies and concrete sealers were observed in the building of the subject property. One (1) 55-gallon steel drum was observed adjacent to the outside west wall of the structure. It was reported by the property owner that it contained waste oil from the periodic on-site maintenance of their equipment. In addition, it was reported the contents of the drum are utilized for a fuel source in an off-site waste oil-fired heater.

No stained soil, indicative of a surface release or spill was observed near the location of the containers or drum.

6.3.5 Dumping or Fill

During performance of the site reconnaissance, no evidence of historic waste dumping or landfilling (i.e. mounds or depressions of unknown origin, construction or demolition debris, or general municipal debris) was observed by LES on or adjacent to the subject property.

6.3.6 Floor Drains

At the time of the site reconnaissance, a floor drain was observed near the forced-air furnace. The floor drain was dry and no odors or stains indicative of a spill or the disposal of hazardous substances were observed. It was reported by the property owner that the drain discharges into the city public sanitary system.

6.3.7 Hazardous Substances as Defined under CERCLA

At the time of the site reconnaissance, hazardous substances (other than the small quantities of miscellaneous supplies listed in Section 6.3.4) were observed within the subject property building or structures.

6.3.8 Odors

During performance of the site reconnaissance, no strong, pungent, or noxious odors were observed on the subject property. However, these observations are general in nature and should not be construed as an air quality assessment.

6.3.9 PCB-Containing Equipment

The main transformers for the subject property are pole-mounted transformers located in the adjacent alley approximately 20 feet northwest of the subject property boundary. A label was observed stating that the transformers did not contain PCBs and no staining or indications of a release were observed on the transformer unit or on the ground beneath the transformer. The transformer and any associated releases are the responsibility of their owner, MidAmerican Energy Company.

6.3.10 Pesticides

At the time of the site reconnaissance, pesticides were not observed to be stored at the subject property.

6.3.11 Petroleum Products

At the time of the site reconnaissance, no petroleum products (other than the waste oil as previously mentioned in 6.3.4) were observed to be stored at the subject property.

6.3.12 Pits, Ponds, or Lagoons

During performance of the site reconnaissance, no pits, ponds, or lagoons were observed on or adjacent to the subject property.

6.3.13 Pools of Liquid

During performance of the site reconnaissance, no pools of liquid likely to be hazardous substances or petroleum products were observed on or adjacent to the subject property.

6.3.14 Potable Water Supplies

According to Mr. Lamar, the subject property is provided potable water by the City of Moline.

6.3.15 Roads and Trails

The subject property is bordered to the east by 41st Street and an access alley adjoins the west boundary.

6.3.16 Sewage Disposal Systems

According to Mr. Lamar, the subject property is provided wastewater service by the City of Moline and he was unaware of any septic systems that may have historically been located on the subject property.

6.3.17 Solid Waste

During performance of the site reconnaissance, no solid waste disposal was observed on the subject property.

6.3.18 Stained Surfaces

Minor staining, typical of small spills from vehicles and equipment, was observed on portions of the vehicle parking areas of subject property. The staining would be considered *de minimis*, and would not be considered a REC.

6.3.19 Storage and Disposal of Hazardous Materials

No hazardous materials were observed being stored at the subject property as described in Section 6.3.7. According to Mr. Lamar, no hazardous wastes were generated and/or disposed from the subject property.

6.3.20 Stressed Vegetation

During performance of the site reconnaissance, no stressed vegetation was observed on or adjacent to the subject property.

6.3.21 Toxic Substances

During the site reconnaissance, no toxic substances beyond those described in previous sections of this report were observed to be stored on the subject property.

6.3.22 Underground Storage Tanks (USTs)

No evidence of existing USTs was observed during the site reconnaissance. Mr. Lamar was unaware of any historic USTs located on the subject property.

6.3.23 Unidentified Substance Containers

During the site reconnaissance, no unidentified substances beyond those described in previous sections of this report were observed to be stored on the subject property.

6.3.24 Urea Formaldehyde Foam Insulation

During the 1970s, many homeowners and some commercial buildings had Urea Formaldehyde Foam Insulation (UFFI) installed in wall cavities as an energy conservation measure. However, UFFI has not been widely used in the USA since 1983.

Due to the recent construction (1994) of the building it is unlikely that UFFI has been installed. During performance of the site reconnaissance, UFFI was not observed by LES. However, these observations are general in nature and should not be construed as an assessment for Urea Formaldehyde.

6.3.25 Wastewater

During the performance of the site reconnaissance, no activities that may have previously generated wastewater, other than typical sanitary discharges from the restroom facilities and the floor drain were observed. According to Mr. Lamar, wastewater generated from these activities is discharged to the city of Moline sanitary sewer system.

6.3.26 Wells

During performance of the site reconnaissance, no water supply, injection, irrigation, dry, abandoned, or other wells were observed by LES.

6.3.27 Asbestos-Containing Material

Based upon the agreed-on scope of services, the ESA did not include an assessment for Asbestos Containing Materials (ACMs).

6.3.28 Lead-Based Paint

Based upon the agreed-on scope of services, the ESA did not include an assessment for Lead-Based Paint (LBP).

6.3.29 Other Observations

During performance of the site reconnaissance, LES made no other observations of site operations or conditions that would be likely to result in a REC on the subject property other than those described in 9.0.

7.0 INTERVIEWS

LES interviewed the current and past available property owners and government officials regarding current and historic operations on the subject property, as well as any historic events that would have the potential to create a REC on the subject property.

7.1 Interviews with the Owner

LES interviewed Dale Lamar (current property owner), regarding general information on the current and historical use of the subject property. Based on the knowledge of Mr. Lamar, no releases of chemicals, disposal of materials, or other incidents of environmental concern have occurred on the subject property. Information obtained during performance of the interviews has been incorporated into text presented within this report, in particular Section 3.4.

7.2 Interviews with Government Officials

During the performance of an environmental assessment, any federal, state and local regulatory agencies having jurisdiction over the subject property are contacted to assess the following information: the status of relevant environmental permits; whether there has been any violations, or other similar correspondence from such agencies; whether any corrective action or remediation is planned, currently taking place, or has been completed at the subject property; whether there have been any reported violations or complaints that the subject property is not in compliance with environmental laws, regulations, or standards, and whether the subject property is under investigation for such non-compliance; whether the subject property is listed on any of the regulatory databases; and whether there is any other pertinent documentation on file with such regulatory agencies regarding the subject property or surrounding sites of concern.

7.2.1 Planning & Zoning Offices

LES contacted the City of Moline Zoning and Planning Department regarding historic development of the subject property. However, the Zoning and Planning Department did not have (other than the aerial photographs) relevant historical information available.

7.2.2 Township Assessor Office

A review of Moline Township historical property record cards revealed that a permit was issued August 9, 1994 to construct a new one-story commercial building on the subject property.

7.2.3 Fire Department

LES contacted the City of Moline Fire Department and they reported that they have not responded to any incidents of accidental releases or spills of hazardous materials at the target property.

7.2.4 Emergency Services

The office of the Rock Island County Emergency Services & Disaster Agency (ESDA) reported they have not responded to any incidents of accidental releases or spills of hazardous materials at the target property.

7.2.5 Health Department

The Rock Island County Health Department reported they have no record of any health incidents associated with the target property.

8.0 FINDINGS, OPINIONS, AND CONCLUSIONS

LES performed a Phase I ESA to assess if historic or current activities conducted at the subject property have created an REC. The Phase I ESA was conducted in general conformance with the “Master Agreement for Subcontractor Services” dated November 30, 2006, the “Master Agreement for Subcontractor Services Task Order” signed June 21, 2007, and is consistent with the American Society for Testing and Materials (ASTM) “Standard Practice for Environmental Site Assessments: Phase I Assessment Process” (Standard Designation E-1527-05) guidelines.

Based on observations made during the Phase I ESA and review of available information, the following Recognized Environmental Condition (RECs) were identified at nearby properties that could have an environmental impact on the subject property:

- A. A review of the Sanborn Maps for the year of 1950 depicted that a filling station with Underground Storage Tanks (USTs) was located at 402 41st Street, Moline, Illinois. The site of the filling station would have been approximately 250 feet north and slightly east of the subject property.
- B. A review of the EDR Radius Map report revealed that a 20,000 gallon diesel fuel UST was located at 4101 4th Avenue, Moline, Illinois. The site of the UST is approximately 275 feet east of the subject property.
- C. In addition, the Sanborn Maps for the years of 1950, 1957 and 1963 identified several car and trailer sales business’s along the corridor of 4th Avenue.

Products of concern associated with these types of RECs include the following:

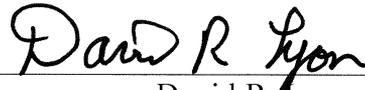

Cleaners	Paint Removers
Petroleum Products	Paint Thinners
Paint	Solvents

9.0 OTHER OBSERVATIONS

During the performance of the site reconnaissance LES observed the following potential source of an environmental concern and brings it to your attention for the sake of caution:

The 55 gallon drum that contained waste oil should be removed from the subject property and the contents of the drum should be properly disposed of at the off-site waste oil-fired heater or at a waste oil disposal/recycling facility.

10.0 SIGNATURE

A handwritten signature in cursive script that reads "David R. Lyon". The signature is written in black ink and is positioned above a horizontal line.

12.0 QUALIFICATIONS

STATEMENT OF QUALIFICATIONS

David R. Lyon

President/Environmental Professional

QUALIFICATIONS:

David Lyon has more than thirty-five (35) years in upper level management with expertise in environmental investigation, remediation and transportation of contaminated waste. This background includes identification of hazardous waste, environmental site assessments, transportation of hazardous products, asbestos identification, contaminated soil and groundwater remediation, underground storage tank identification and removal.

EXPERIENCE:

Ten (10) years as President, with emphasis in environmental business and project management.

Three (3) years as Vice President, environmental business development and project management.

Five (5) years as Zone Manager, responsible for twenty-five (25) agricultural chemical plants.

Six (6) years as Area Manager, responsible for the transportation and storage of bulk and liquid chemical products.

Eight (8) years as Plant Manager, manufacturing and distribution of agricultural chemical products.

Five (5) years as warehouse and transportation manager.

Mr. Lyon has conducted environmental Adué diligence@ site assessments on residential, commercial, industrial, agricultural properties. These comprehensive audits range from multi-family housing, institutional properties, and complex industrial sites to a real estate transaction consisting of 35,000 acres of agricultural land. Mr. Lyon has worked with all types of interested parties (attorneys, buyers, sellers, lessees, lenders, and stockholders) assessing potential environmental liabilities associated with property transfers

Experience in the design and construction of chemical storage and handling facilities include containment diking and emergency pumping systems.

Participated and directed the remediation activities at sites with liquid, dry bulk and packaged storage capabilities of hazardous, corrosive, and flammable products. Several projects completed involved storage tanks both above and underground, ranging in capacity of 500 gallons to 30,000 gallons. These projects range from routine tank closures to the remediation of soil and groundwater.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

FEDERAL RECORDS

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/14/2007 has revealed that there is 1 CORRACTS site within approximately 1 mile of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
<i>SIVYER STEEL CORP</i>	<i>225 S 33RD ST</i>	<i>1/2 - 1 NNW 11</i>	<i>11</i>	<i>51</i>

RCRAInfo: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System(RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month Large quantity generators generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/13/2006 has revealed that there are 3 RCRA-SQG sites within approximately 0.25 miles of the target property.

IL CAT: Illinois Category List.

A review of the IL CAT list, as provided by EDR, and dated 06/01/1997 has revealed that there is 1 IL CAT site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
MOLINE ACCESSORIES CO Facility Type: SITE REMEDIATION PROGRAM	5447 3RD AVE	1/2 - 1 E	12	55

IL LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Illinois Environmental Protection Agency's LUST Incident Report.

A review of the IL LUST list, as provided by EDR, and dated 05/11/2007 has revealed that there is 1 IL LUST site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
CLARK OIL & REFINING NFA/NFR Letter: 2006-08-24	4201 4TH AVE.	0 - 1/8 SE	B4	45

IL UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Illinois State Fire Marshal's STC Facility List.

A review of the IL UST list, as provided by EDR, and dated 03/07/2007 has revealed that there are 4 IL UST sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>

EXECUTIVE SUMMARY

IL ENG CONTROL: Sites with Engineering Controls.

A review of the IL ENG CONTROLS list, as provided by EDR, and dated 05/11/2007 has revealed that there are 2 IL ENG CONTROLS sites within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
CANTEEN CORPORATION	3420 2ND AVENUE	1/4 - 1/2 W	10	50
<u>Lower Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
MARINE CORPS RESERVE CENTER	3900 RIVER DRIVE	1/8 - 1/4 NW	C8	48

IL INST CONTROL: Legal or administrative restrictions on land use and/or other activities (e.g., groundwater use restrictions) which effectively limit exposure to contamination may be employed as alternatives to removal or treatment of contamination.

A review of the IL Inst Control list, as provided by EDR, and dated 05/11/2007 has revealed that there is 1 IL Inst Control site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>
CANTEEN CORPORATION	3420 2ND AVENUE	1/4 - 1/2 W	10	50

IL SRP: Illinois Environmental Protection Agency, Site Remediation Program Database

A review of the IL SRP list, as provided by EDR, and dated 05/11/2007 has revealed that there are 2 IL SRP sites within approximately 0.5 miles of the target property.

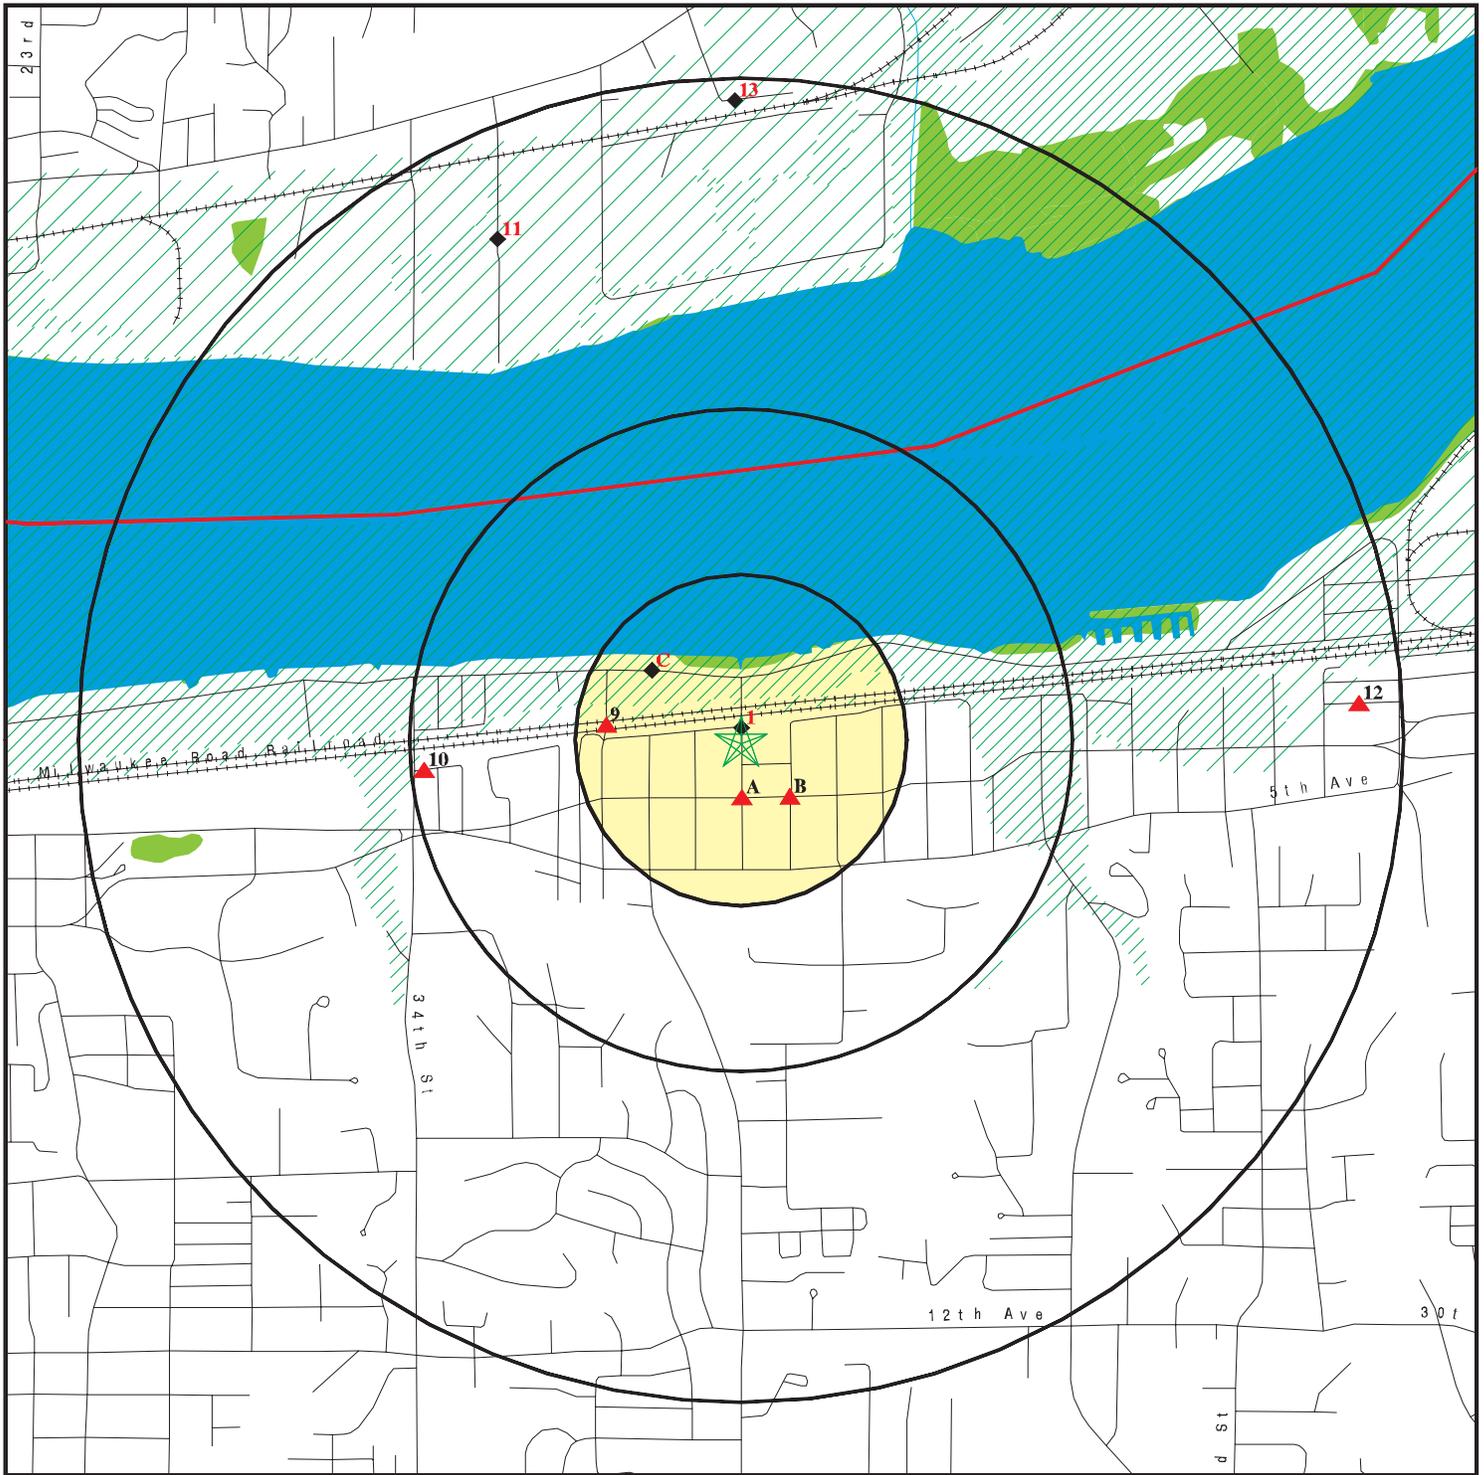

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Dist / Dir</u>	<u>Map ID</u>	<u>Page</u>

Other Pertinent Environmental Activity Identified at Site

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

ACES (Illinois - Agency Compliance And Enforcement System) is the Illinois EPA Project to facilitate the permitting operations

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AFS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major

redesign to support facility operating permits required under Title V of the Clean Air Act.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and its Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

EPA Waste Codes Addendum

Code	Description
------	-------------

D001	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
------	---

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/27/2006	Source: EPA

	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Next Scheduled EDR Contact: 06/18/2007

Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

RCRA: Resource Conservation and Recovery Act Information

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/13/2006	Source: EPA
Date Data Arrived at EDR: 06/28/2006	Telephone: 312-886-6186

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DOD: Department of Defense Sites

This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005	Source: USGS
Date Data Arrived at EDR: 11/10/2006	Telephone: 703-692-8801
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 05/11/2007
Number of Days to Update: 62	Next Scheduled EDR Contact: 08/06/2007
	Data Release Frequency: Semi-Annually

FUDS: Formerly Used Defense Sites

The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 12/31/2005	Source: U.S. Army Corps of Engineers
Date Data Arrived at EDR: 09/20/2006	Telephone: 202-528-4285
Date Made Active in Reports: 11/22/2006	Last EDR Contact: 04/02/2007
Number of Days to Update: 63	Next Scheduled EDR Contact: 07/02/2007
	Data Release Frequency: Varies

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients--States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 04/04/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/04/2007	Telephone: 202-566-2777
Date Made Active in Reports: 05/25/2007	Last EDR Contact: 06/11/2007
Number of Days to Update: 51	Next Scheduled EDR Contact: 09/10/2007
	Data Release Frequency: Semi-Annually

CONSENT: Superfund (CERCLA) Consent Decrees

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: 08/23/2006	Source: Department of Justice, Consent Decree Library
Date Data Arrived at EDR: 03/06/2007	Telephone: Varies
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 04/23/2007
Number of Days to Update: 35	Next Scheduled EDR Contact: 07/23/2007
	Data Release Frequency: Varies

ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 03/27/2007	Source: EPA
Date Data Arrived at EDR: 03/27/2007	Telephone: 703-416-0223
Date Made Active in Reports: 04/27/2007	Last EDR Contact: 03/27/2007
Number of Days to Update: 31	Next Scheduled EDR Contact: 07/02/2007
	Data Release Frequency: Annually

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 12/31/2005	Source: Department of Energy
Date Data Arrived at EDR: 11/08/2006	Telephone: 505-845-0011
Date Made Active in Reports: 01/29/2007	Last EDR Contact: 05/17/2007
Number of Days to Update: 82	Next Scheduled EDR Contact: 06/18/2007
	Data Release Frequency: Varies

ODI: Open Dump Inventory

An open dump is defined as a disposal facility that does not comply with one or more of the Part 257 or Part 258 Subtitle D Criteria.

Date of Government Version: 06/30/1985	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/09/2004	Telephone: 800-424-9346
Date Made Active in Reports: 09/17/2004	Last EDR Contact: 06/09/2004
Number of Days to Update: 39	Next Scheduled EDR Contact: N/A
	Data Release Frequency: No Update Planned

TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2004	Source: EPA
Date Data Arrived at EDR: 06/22/2006	Telephone: 202-566-0250
Date Made Active in Reports: 08/23/2006	Last EDR Contact: 06/19/2007
Number of Days to Update: 62	Next Scheduled EDR Contact: 09/17/2007
	Data Release Frequency: Annually

TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2002	Source: EPA
Date Data Arrived at EDR: 04/14/2006	Telephone: 202-260-5521
Date Made Active in Reports: 05/30/2006	Last EDR Contact: 04/16/2007
Number of Days to Update: 46	Next Scheduled EDR Contact: 07/16/2007
	Data Release Frequency: Every 4 Years

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 02/26/2007	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-566-1667
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 06/15/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 09/17/2007
	Data Release Frequency: Quarterly

FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act) A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 02/26/2007	Source: EPA
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-566-1667
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 06/15/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 09/17/2007
	Data Release Frequency: Quarterly

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Date of Government Version: 12/31/2005	Source: EPA
Date Data Arrived at EDR: 03/13/2007	Telephone: 202-564-4203
Date Made Active in Reports: 04/27/2007	Last EDR Contact: 04/12/2007
Number of Days to Update: 45	Next Scheduled EDR Contact: 07/16/2007
	Data Release Frequency: Annually

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 12/09/2005	Source: Department of the Navy
Date Data Arrived at EDR: 12/11/2006	Telephone: 843-820-7326
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 06/11/2007
Number of Days to Update: 31	Next Scheduled EDR Contact: 09/10/2007
	Data Release Frequency: Varies

DOT OPS: Incident and Accident Data

Department of Transportation, Office of Pipeline Safety Incident and Accident data.

Date of Government Version: 02/14/2007	Source: Department of Transportation, Office of Pipeline Safety
Date Data Arrived at EDR: 02/28/2007	Telephone: 202-366-4595
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 05/30/2007
Number of Days to Update: 41	Next Scheduled EDR Contact: 08/27/2007
	Data Release Frequency: Varies

ICIS: Integrated Compliance Information System

The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

Date of Government Version: 02/21/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/03/2007	Telephone: 202-564-5088
Date Made Active in Reports: 05/14/2007	Last EDR Contact: 04/16/2007
Number of Days to Update: 41	Next Scheduled EDR Contact: 07/16/2007
	Data Release Frequency: Quarterly

LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 03/08/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/12/2007	Telephone: 202-564-6023
Date Made Active in Reports: 05/14/2007	Last EDR Contact: 05/21/2007
Number of Days to Update: 32	Next Scheduled EDR Contact: 08/20/2007
	Data Release Frequency: Varies

RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 05/01/2007	Source: Environmental Protection Agency
Date Data Arrived at EDR: 05/03/2007	Telephone: 202-343-9775
Date Made Active in Reports: 05/25/2007	Last EDR Contact: 05/03/2007
Number of Days to Update: 22	Next Scheduled EDR Contact: 07/30/2007
	Data Release Frequency: Quarterly

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 12/01/2006	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 01/08/2007	Telephone: 202-307-1000
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 06/06/2007
Number of Days to Update: 3	Next Scheduled EDR Contact: 06/25/2007
	Data Release Frequency: Quarterly

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 06/15/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 09/17/2007
	Data Release Frequency: No Update Planned

PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 10/17/2006	Source: EPA
Date Data Arrived at EDR: 11/29/2006	Telephone: 202-566-0500
Date Made Active in Reports: 01/11/2007	Last EDR Contact: 06/08/2007
Number of Days to Update: 43	Next Scheduled EDR Contact: 08/06/2007
	Data Release Frequency: Annually

MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/05/2007	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 04/25/2007	Telephone: 301-415-7169
Date Made Active in Reports: 05/25/2007	Last EDR Contact: 04/02/2007
Number of Days to Update: 30	Next Scheduled EDR Contact: 07/02/2007
	Data Release Frequency: Quarterly

MINES: Mines Master Index File

Contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

Date of Government Version: 02/06/2007	Source: Department of Labor, Mine Safety and Health Administration
Date Data Arrived at EDR: 03/28/2007	Telephone: 303-231-5959
Date Made Active in Reports: 05/14/2007	Last EDR Contact: 03/28/2007
Number of Days to Update: 47	Next Scheduled EDR Contact: 06/25/2007
	Data Release Frequency: Semi-Annually

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 01/18/2007	Source: EPA
Date Data Arrived at EDR: 01/23/2007	Telephone: (312) 353-2000
Date Made Active in Reports: 02/27/2007	Last EDR Contact: 05/14/2007
Number of Days to Update: 35	Next Scheduled EDR Contact: 07/02/2007
	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2005	Source: EPA/NTIS
Date Data Arrived at EDR: 03/06/2007	Telephone: 800-424-9346
Date Made Active in Reports: 04/13/2007	Last EDR Contact: 06/12/2007
Number of Days to Update: 38	Next Scheduled EDR Contact: 09/10/2007
	Data Release Frequency: Biennially

STATE AND LOCAL RECORDS

IL SHWS: State Oversight List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 04/04/2007	Source: Illinois Environmental Protection Agency
Date Data Arrived at EDR: 04/18/2007	Telephone: 217-524-4863
Date Made Active in Reports: 05/14/2007	Last EDR Contact: 05/21/2007
Number of Days to Update: 26	Next Scheduled EDR Contact: 08/20/2007
	Data Release Frequency: Semi-Annually

IA SHWS: Registry of Hazardous Waste or Hazardous Substance Disposal Sites

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Number of Days to Update: 42	Next Scheduled EDR Contact: 07/02/2007
	Data Release Frequency: Quarterly

IL UIC: Underground Injection Wells

Injection wells are used for disposal of fluids by "injection" into the subsurface. The construction of injection wells range from very technical designs with twenty-four hour monitoring to simply a hole dug in the ground to control runoff. As a result of this diversity, the UIC Program divides injection wells into five different classes.

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation
Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

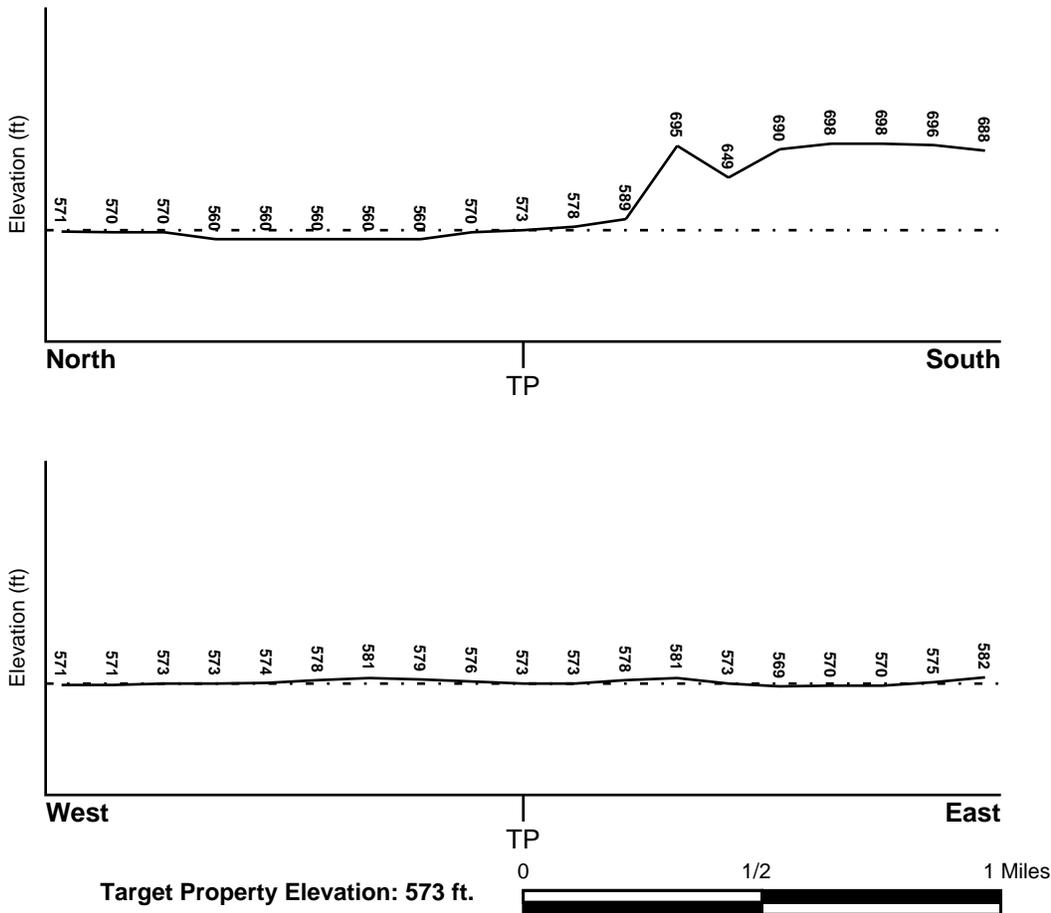

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> SILVIS	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
--	---

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Devonian
Series: Middle Devonian
Code: D2 (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: DRUMMER

Soil Surface Texture: silty clay loam

Hydrologic Group: Class B/D - Drained/undrained hydrology class of soils that can be drained and are classified.

Soil Drainage Class: Poorly. Soils may have a saturated zone, a layer of low hydraulic conductivity, or seepage. Depth to water table is less than 1 foot.

Hydric Status: Soil meets the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	14 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 2.00 Min: 0.60	Max: 7.80 Min: 5.60
2	14 inches	41 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 2.00 Min: 0.60	Max: 7.80 Min: 5.60
3	41 inches	47 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 2.00 Min: 0.60	Max: 8.40 Min: 6.10
4	47 inches	60 inches	stratified	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Clayey sand.	Max: 2.00 Min: 0.60	Max: 8.40 Min: 6.60

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silt loam
loam

Surficial Soil Types: silt loam
loam

Shallow Soil Types: clay loam

Deeper Soil Types: loam
sand and gravel
gravelly - coarse sand
loamy sand

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

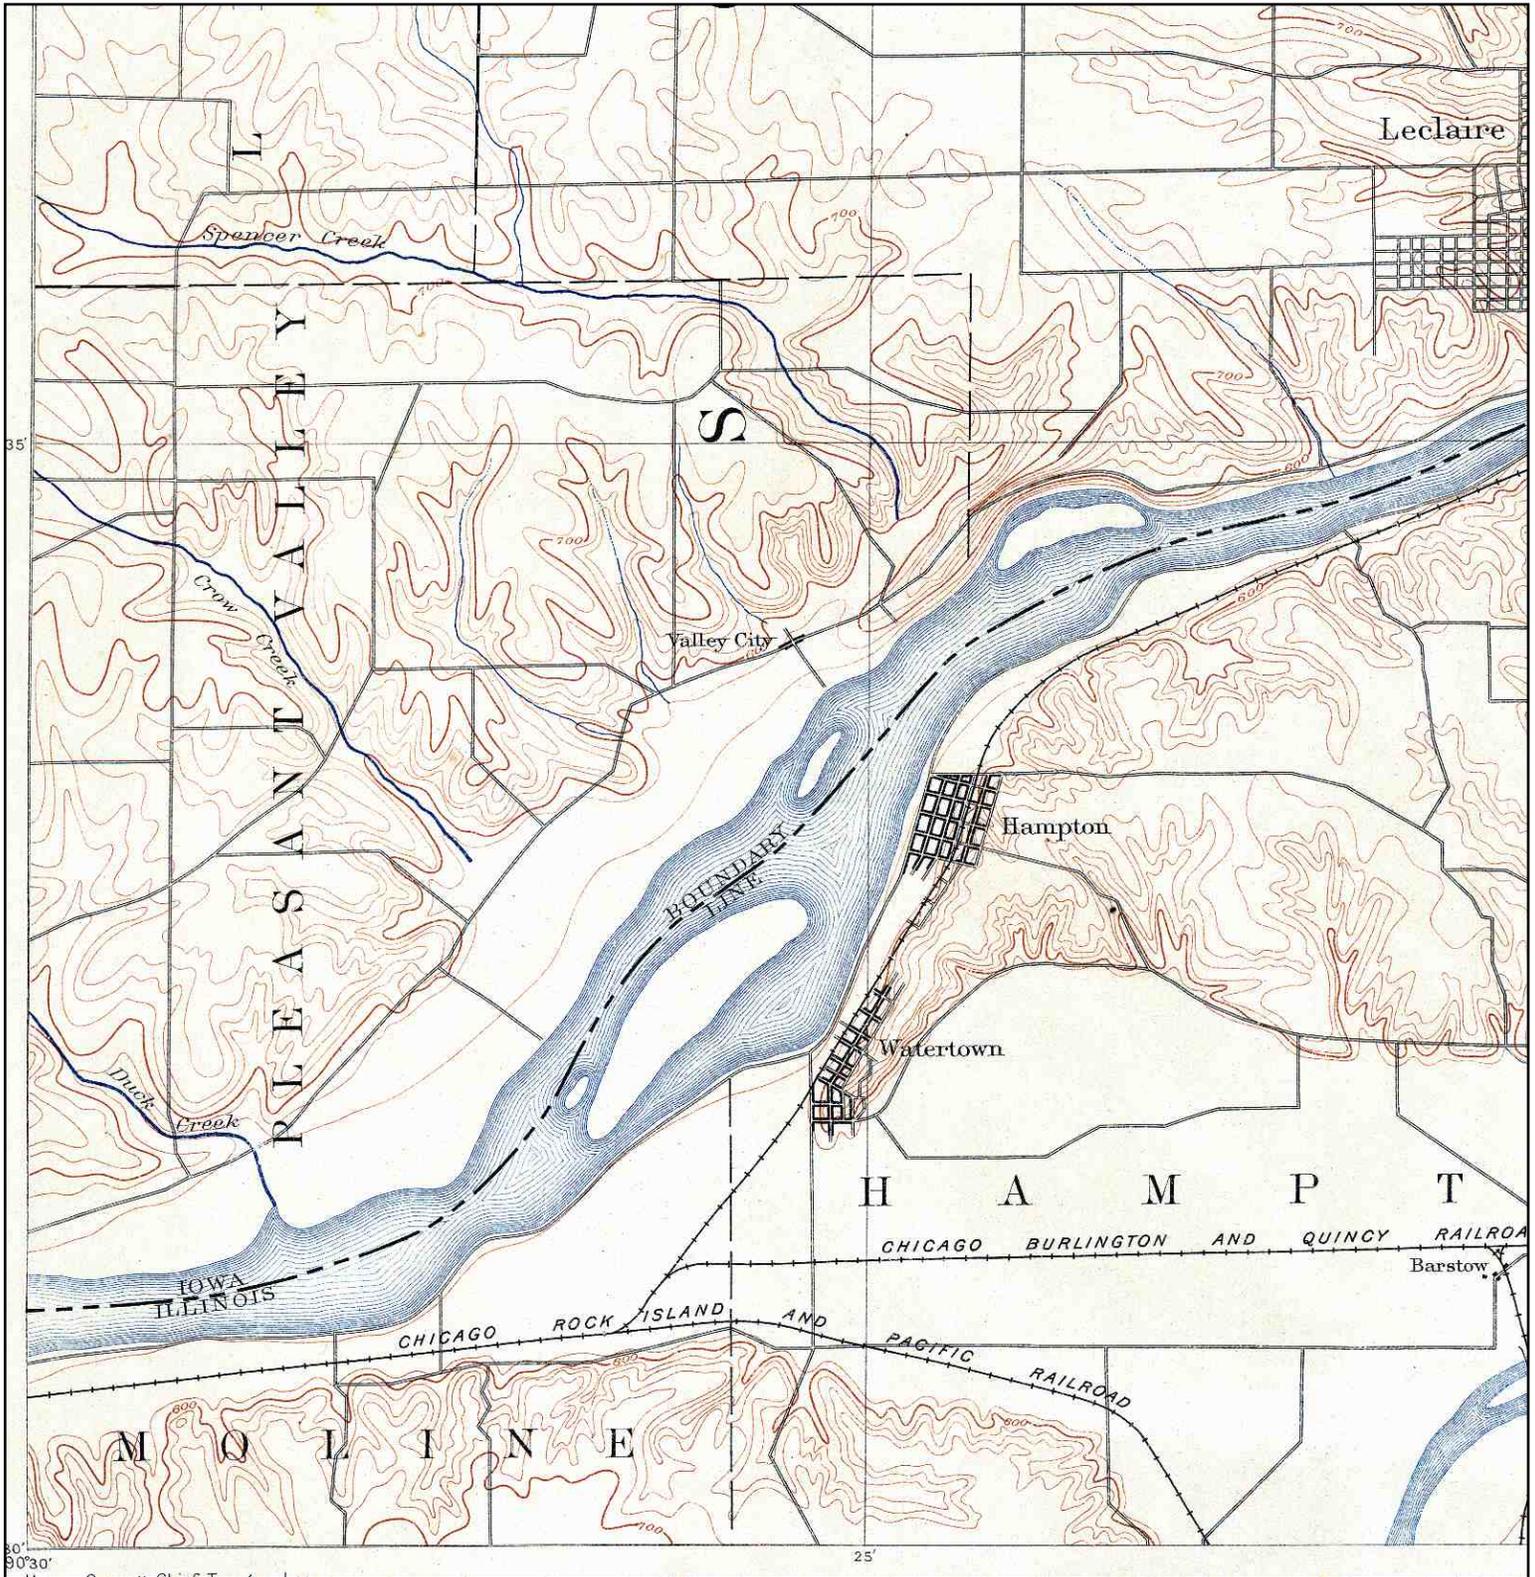

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.
