1. Approval of minutes of the Traffic Engineering Committee meeting of November 4, 2014.
-

2. Request to prohibit parking on the north side of 33rd Avenue between the property lines of 931 33rd Avenue.

Explanation: Request was made by a resident living on 33rd Avenue. Resident stated that it is difficult for drivers to enter and exit 9th Street A when vehicles are parked on the north side of 33rd Avenue between the property lines of 931 33rd Avenue. Resident stated that it is especially difficult in the winter when a driver attempts to make a right hand turn onto 33rd Avenue when a car is parked in said location. Resident fears that a driver will lose control of their vehicle and hit a car parked in this location during wintry conditions. In addition, the resident stated that the Sanitation Department turns their garbage vehicles around in this location. It is difficult for these employees to maneuver when a vehicle is parked here.

3. Other.
