

Traffic Engineering Committee

Agenda

1:30 p.m.
Tuesday, January 8, 2019

Agenda Items

1. Approval of minutes of the Traffic Engineering Committee meeting of November 6, 2018.
2. Request to review a blanket 30mph speed limit and consider reducing it to 25mph.
3. Consideration to modify current traffic control at Jane Addams Elementary School.
4. Other.

1. Approval of minutes of the Traffic Engineering Committee meeting of November 06, 2018.

2. Request to review a blanket 30mph speed limit and consider reducing it to 25mph.

Explanation: City Council has asked Staff to review a blanket 30mph speed limit and consider reducing it to 25mph.

3. Consideration to modify current traffic control at Jane Addams Elementary School.

Explanation: Moline Police Department requested modifications to the current traffic control. Additional documentation attached.

4. Other.

No. 3/Attachment: Consideration to relocate crosswalk at Jane Addams Elementary School.

Current setup:

1. 54th Street at 53rd Street (blue rectangle) is the current location of the crossing guard.
2. There are two lighted (solar powered) school crossing signs at 54th St/53rd St intersection.
3. Some parking in the church parking lot across from the school, but has asked that cars not use their parking lot as a through road.
4. No right turn sign out of the school on school days...children present.

Proposed setup:

1. Yellow rectangle is proposed location of the crossing guard.
2. Would ask the lighted signs be moved to a more appropriate location.
3. Remove turning restrictions coming out of the school lot.
4. Removable pedestrian crossing sign in the middle of 53rd Street crossing.

Special consideration:

1. Line of sight approaching the crosswalk from the north/south.
2. Does the length of the school zone change?
3. Effect of the cross walk at that location on the current traffic pattern at drop off/pickup.
